2. The second part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as $t \rightarrow \infty$. It is shown that the solutions of the system (1) tend to zero as $t \rightarrow \infty$ if and only if the matrix A is stable.

The first of these is the
 fact that the system is
 not self-sufficient. It
 is dependent on the
 government for its
 maintenance and
 operation. This is
 a serious defect, and
 one which must be
 remedied. The second
 defect is that the
 system is not
 flexible. It is not
 able to adapt to
 changing conditions.
 This is also a serious
 defect, and one which
 must be remedied.
